

Client
Formby High School

Location
Formby, Southport

Project Value
£800,000

Sector
Education

A CIF scheme, involving the replacement of the external facade curtain walling, windows and roofing along with associated M&E alteration works to the four-storey C block building.

Senate has undertaken the removal of asbestos, replacement of the external curtain walling, windows and doors and replacement of the flat roof coverings and insulation.

The works has involved Senate keeping completely segregated from the school through security screening to external elevations as the works progress and twilight shifts.

These have been undertaken so there has been no disruption to the school environment and daily operations.

Senate has also had the opportunity to work closely with the school on community projects, signage and career days with students, developing a close relationship with Formby High School.

“

We love carrying out this type of work. It really makes a difference to the appearance of a building. Everyone has commented how much brighter and cleaner the building looks now.
