

Carbon Reduction Plan

Supplier name: Senate Mech Ltd

Publication date: 02/10/2026

Commitment to achieving Net Zero

Senate Mech Ltd is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025

Additional Details relating to the Baseline Emissions calculations.

It is based on our financial accounting year of May to April.

Our Baseline calculation includes:

- Scope 1: Direct Emissions
- Scope 2: Indirect Emissions
- Scope 3 Categories: 4: Upstream transportation & distribution: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking:

Our Baseline deviates from the requirements under PPN006 as follows:

- Scope 3: Category 9: Downstream transportation & distribution: is not included as no transport is paid for by customers.

Baseline year emissions:

EMISSIONS	TOTAL (tCO ₂ e)		
Scope 1	74.1 tCO ₂ e		
Scope 2	2.2 tCO ₂ e	Scope 2 (Market-based)	2.2 tCO ₂ e
Scope 3 (Included sources as detailed above)	161.2 tCO ₂ e		
Total Emissions	237.5 tCO ₂ e	Total Emissions (Market Based)	237.5 tCO ₂ e

Carbon Reduction Plan

Current Emissions Reporting

Reporting Year: May 2025 to Apr 2026			
EMISSIONS	TOTAL (tCO ₂ e)		
Scope 1	60.5 tCO ₂ e		
Scope 2	2 tCO ₂ e	Scope 2 (Market-based)	2 tCO ₂ e
Scope 3 (Included sources as detailed above)	93.9 tCO ₂ e		
Total Emissions	156.4 tCO ₂ e	Total Emissions (Market Based)	156.4 tCO ₂ e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 190 tCO₂e by 2030. This is a reduction of 20 %

Progress against these targets can be seen in the chart below:

Chart shows Location based total

Carbon Reduction Plan

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2025 baseline and the measures will be in effect when performing the contract. The carbon emission reduction achieved by these schemes equate to 81.1 tCO₂e, a 34.1% reduction against the 2025 baseline.

- Toolbox talk delivered to employees on 'efficient driving' and company vehicle fuel use decreased by 19% vs last year
- Business travel emissions reduced by 47%

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Share company carbon footprint and goals with all stakeholders
- Reduce emissions from company vehicles by increasing miles per gallon achieved by 5% and reinforcing importance of 'efficient driving' to employees through Toolbox Talks
- Reduce commuting emissions through promotion of alternative commuting methods
- Engage with skip providers to improve data recording and reduce their emissions

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN006 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
